

The Five Villages Hall project news 8th Jan 2021

Work has just started at the Station Road village hall site in Backford. MPH Construction Ltd 'broke ground' on 4th January at the start of the community's £1m project to build a new hall. Once completed the old 1950 hall will be demolished. Site levels and footings are being prepared as the pic shows.

An exciting physical start to a project four years in preparation made possible by generous national funders, local funders, many, many hall events, and private donors.

The hall committee would like to thank our local community and our three parish councils for their financial contributions of £50,000 via the precept, a significant factor in making this community asset happen.

With the ground prepared, the next jobs include concrete pouring followed by steelwork erection. More soon.
